Ladies and Gentlemen:

Your Finance Committee of the Board of Directors of the Cook County Health and Hospitals System met pursuant to notice on Friday, September 26, 2008 at the hour of 10:00 A.M. at Stroger Hospital, 1901 West Harrison Street, in the fifth floor conference room, in Chicago, Illinois.

Your Finance Committee has considered the following items and upon adoption of this report, the recommendations follow.

Roll Call

Matthew B. DeLeon, Secretary to the Board, called the roll of members, and it was determined that a quorum was present.

Presentation of July 2008 Financials

Pitt Calkin, Interim Chief Financial Officer of the Cook County Health and Hospitals System appeared before the Committee, and presented the July 2008 Financials. (See Attachment #1.) He responded to several questions from Directors pertaining to the information provided. He added that when he presents the August 2008 Financials, he will present the inpatient and outpatient data separately in graphical format.

In response to a question with regard to improving the ability to estimate in order to present the accruals, Mr. Calkin stated that he will be meeting on the following Tuesday with the Chief Financial Officers of the System's institutions, the expenditure control department and the accounts payable department to craft a methodology. What may be necessary is what auditors refer to as an "out of period search." This involves physically collecting invoices from each of the large departments and placing them on a control sheet. This would be used to determine the accrual until the invoices are paid in the future.

During the discussion regarding non-operating revenues, Chairman Carvalho inquired whether a report of expenses relative to cash flow could be prepared. In particular, although the Directors have asked that information be presented in GAAP format, nonetheless the County budgeting and expenditure system is presented on a cash basis, so Directors also need to see how the System is doing on a cash basis. Mr. Calkin replied that a report exists which shows encumbrances; he could work towards creating such a report with the additional information¹.

Some questions were raised with regard to the current Limit of Liability policy; Mr. Calkin stated that he would soon be bringing policy revisions to the Committee for their consideration².

While the Committee discussed issues relative to coding, Director Ansell noted that in January, Recovery Audit Contractors (RACs) will be coming to Illinois; this program was created to detect and correct improper payments in the Medicare program. They will be examining short stays.

Mr. Small indicated that starting the following Monday, MedAssets will be evaluating the coding processes.

During the presentation of the July 2008 Financials, Chairman Carvalho noted that a quorum was no longer present. He stated that the Committee would continue to review and discuss the items, but no action would be taken by the Committee due to the lack of a quorum of members. He added that the report would still be presented to the Board indicating the Committee's review and discussion of the items, however, the items requiring action would need to be presented to the Board of Directors. These items should be placed on the Board's agenda for the meeting of October 3, 2008 for their consideration.

Contracts and Procurement Approvals*

Additional information pertaining to these items is included in Attachment #2.

*These items were reviewed, considered and discussed by those members of the Finance Committee who were present. However, due to the lack of a quorum, consideration and approval by the full Board of Directors is necessary. Although the Committee did not take formal action at the meeting, Chairman Carvalho inquired whether those members present concurred with the recommendation to approve the items presented, with the exception of those items which were withdrawn. Chairman Carvalho, Directors Golden and O'Donnell stated that they concurred.

In response to an inquiry regarding the contract with Parata Systems, LLC, for the purchase of automated medication filling equipment for the new pharmacies that are being constructed at Stroger Hospital and Fantus Clinic, Mr. Small stated that he would get additional information on the item prior to the Board's consideration of the item at its meeting on October 3, 2008³.

It was stated for the record that Directors Ansell and O'Donnell had questions pertaining to some of the withdrawn items.

During the review of the Contracts and Procurement Items, the discussion turned to the subject of general purchasing organizations (GPO). Leslie Duffy, Director of Procurement for the Cook County Health and Hospitals System, stated that efforts are ongoing. She is in the process of looking at the forty-four existing distributors, with the goal of finding primary and secondary distributors. She stated that she may be able to present information at the next Finance Committee meeting reflecting the potential savings once the contracts are converted⁴. Chairman Carvalho encouraged Ms. Duffy to evaluate the GPO possibilities without regard to any impediments that may exist under existing County ordinances so that the County Board could be informed of all possible savings, including savings that may require changes to existing ordinances.

Consideration and Approval of Proposed Fiscal Year 2009 Budget
Cook County Health and Hospitals System

Mr. Calkin presented to the Committee a draft proposal for the System's Proposed Fiscal Year 2009 Budget.

Discussion and review proceeded, on issues including, but not limited to, those with regard to efficiencies, supply chain improvements, critical infrastructure needs, staffing, employee benefits and program additions. Mr. Calkin and Mr. Small responded to several questions from Directors on the information presented.

During the discussion of critical infrastructure needs, Director O'Donnell inquired whether a plan was in place to return for the Board's future consideration in the following fiscal years those needs that do not get funding this year. Mr. Small stated that the plan would be added.

Chairman Carvalho requested a cost/revenue analysis on filling Medicaid prescriptions⁵. In particular, does the System make money filling Medicaid prescriptions or lose money and if the latter, is it advisable to expand capacity rather than re-directing Medicaid patients to other sources?

After the presentation, Mr. Small asked the Committee for direction on how to proceed at this point. He noted that Jarese Wilson, Director of the Cook County Department of Budget and Management, was present.

Ms. Wilson stated that loading the System's proposed budget into the County's Budget System, albeit on a "tentative" basis, would help with balancing if it were loaded now; the Health System is the only department left that has not submitted its proposed budget.

Mr. Small stated that the budget could be fully loaded in, pending further Board approval.

Chairman Carvalho, Director Golden and Director O'Donnell concurred on the recommendation to the Board of Directors and the administration that the proposed budget, as presented as a draft outline at this meeting, be loaded into the County's Budget system now, subject to further possible refinements.

New Business

Director Golden provided an update with regard to Strategic Planning efforts. She indicated that the group has identified a need for a consultant to work with the Board and the Strategic Planning Committee. This assistance is needed for the large planning process, particularly to help with the gathering and analysis of information and the preparations of materials for the meeting in October or November.

Chairman Carvalho suggested that Director Golden work with Mr. Small to prepare a contract to bring back to the Finance Committee in order to secure such services.

Summary

The operating performance of the Cook County Health and Hospitals System was below the budget by approximately 1.5%. The lower than expected operating performance was the result of lower than budget operating revenue year to date that was not offset by a reduced level of year to date expenses at the end of July. Revenue was below the budget by \$36,254,987. Operating expenses year to date were below the budget by \$30,334,720 at the end of July.

Operating Revenue

Total operating revenue was below the budget by over 12% year to date at the end of July. At the end of June year to date revenue was below the budget by a similar level. Patient fee revenue and revenue from Intergovernmental Transfers were below budget at the end of July. The shortfall of fee revenue and IGT revenue were partially offset by a favorable year to date level of other revenue.

The System management continues to work with the officials of the state Medicaid program to complete the account reconciliations. It is hoped that the potential increased revenue from the reconciliations of an estimated 11.6 million dollars would offset a portion of the over 15 million dollar reduction in the IGT revenue.

The System will continue to work with Medassets to improve the charging, billing and collection of patient fee revenue. It is hoped that the level of collections can be increased by the end of the fiscal year. The System currently projects that patient fee revenue will be below the budget by approximately 36.4 million dollars at year end.

Operating Expenses

The System's operating expenses were below the budget by \$30,334,720 or 4.3% year to date at the end of July. The favorable level of expenses was at the end of July primarily the result of lower than planned expenses for supplies, purchased services, and utilities. Salaries, wages and benefits were slightly over budget year to date at the end of July.

Salaries and Wages (\$565,295) or -.2%

Salaries and wages exceed the budget at the end of July. The budget was spread to the months of the fiscal year on an even basis through out the fiscal

year. The impact of summer vacations and the July 4th holiday on replacement time have contributed to the unfavorable variance. The level of labor related expense will continue to be monitored closely with an additional emphasis on the use of overtime.

Supplies \$8,069,842 or 8.2%

Supply expense continues to be estimated by adding an accrual of 60% to the actual amounts paid by the county. This method is not ideal and the System finance staff will continue to explore ways to improve the accuracy of the estimates for supply expense.

Purchased Services, Rental, and Other \$21,194,299 or 21.1%

The same methodology for the estimation of supply expense is used to estimate expenses for this category.

Utilities \$1,737,062 or 12.4%

The estimates for utility expense are based on reports of actual payments by the County for System facilities. The 2008 budget was assigned to periods without any adjustment for the prior seasonal pattern of expense. It should be possible next year to provide a better seasonal match of the budget and actual expense for utilities now that the system receives regular information from the County.

Volume

The year to date inpatient volume of the System through the month of July has exceeded the planned level of activity in the budget by approximately 5%. The volume of fiscal 2008 outpatient services through the end of July has been below the budget. Emergency Room visits are below the budget at all three inpatient facilities by a total of 3839 visits or 2.9%. The visits to the ACHN clinics are also down year to date through the end of July by 2.4% or 9633 visits.

Non Operating Revenue

The actual year to date non-operating revenue is below the budget by 8.6% or \$29,878,870. The non-operating revenue obtained from sales taxes is expected to increase for the balance of the fiscal year. The new higher rate for Cook County sales tax rate was implemented on July 1, 2008.

Description of Services: Siemens Medical Corporation (Contract No. 06-41-274)
▪ Patient Statement Mailers Fees

Justification for this Increase: Our Siemens contract for the last three (3) years expires January 09, 2009. During the three (3) year contract period CCHHS began to generate patient statement mailers for self-pay patients, the cost of which was never included in the original contract. Therefore, CCHHS doesn't have enough funds on the current contract for the remaining three (3) months. The attachment describes in detail the funds needed for payment of these services to continue.

Cost of the Increase and Terms: This increase is \$666,989.30. This increase will allow patient statement mailers to be provided until 01/09/09.

Budget Information: Fiscal Impact 2008: \$666,989.30
Approval of this item will commit Fiscal Year(s)

**CONTRACT REQUEST FROM COOK COUNTY HEALTH AND
HOSPITALS
SYSTEM**

Date: September 22, 2008

Sponsor: David R. Small, F.A.C.H.E.
Chief Operating Officer

Operating Unit: Bureau Health Systems

Description of Services: Requesting payment in the amount of \$1,492,526.00 to Respiratory Health Association of Metropolitan Chicago (RHAMC), Chicago, Illinois for the provision of Smoke Free Lung Health Program of Cook County designed to expand smoking cessation services and improve asthma outcomes in Cook County. Contract Number 08-41-215 was Approved by the County Board on March 18, 2008 contract period from March 6, 2008 through March 5, 2013 for the Bureau of Health Systems.

Justification for This Contract: As Chicago's lung health leader since 1906, RHAMC is a natural partner for this project. RHAMC has been a leader in delivering tobacco cessation services to the Chicago community and in training individuals to deliver tobacco cessation. RHAMC participated in or leads numerous local asthma initiatives in Cook County, including: Addressing Asthma in Englewood; Controlling Pediatric Asthma through Collaboration and Education; and the Stakeholders Collaboration to Improve Student Health.

In Cook County, 690,000 adults smoke cigarettes, with increased smoking rates in the lowest socio-economic neighborhood. Research shows that cessation programs in hospitals, health centers, and other community settings effectively reduce morbidity and mortality from smoking. These programs are cost-effective because they reduce the burden of tobacco related illness upon the community and the County.

The rates of asthma and hospitalizations due to asthma in Cook County and Illinois are nearly double national rates, especially among African-American and Puerto Rican Communities. National and local studies have shown improved childhood asthma outcomes can be achieved through education delivered by health care organizations and trained community health educators.
